

SAFETY ALERT – DON'T LET THE SNOW GET YOU

Sometimes winter weather can sneak up on us, so be extra prepared before it gets here.

We are under a Winter Storm Watch! Don't let your excitement conflict with your safety as the snow starts to fall. Please use the STOP model as you travel around the resort and remember these tips:

1. Skiing and snowboarding – Dial back your riding style. Slow down before you transition onto different snow surfaces. Stay off the sides of the run – the snow there might look soft, but it is not (quite) deep enough yet for powder turns!

2. Walking – Expect every surface to be slippery, going from one type of surface to another. A layer of fresh snow can conceal ice underneath, so walk like a penguin and keep your center of gravity low.

3. Driving – Give yourself extra space and stopping time. You'll get where you're going, just take it slow. Drive like you have a cup of coffee sitting on your dashboard that you don't want to spill.
